EXPERIENCE

Kroger Technology & Digital

SENIOR DEVOPS ENGINEER & DEVOPS PLATFORM TECH LEAD | KROGER HEALTH & WELLNESS

Cincinnati, OH (Remote) | July 2018 – Present

Role: Technical Lead for H&W DevOps Team(s) (~15 engineers), supporting 20+ product teams with 400+ repositories.

- Led DevOps team execution by setting direction, aligning priorities, and providing hands-on guidance.
- Performed technical screening interviews and onboarding for new DevOps engineering resources.
- Authored technical documentation to standardize DevOps practices and scale onboarding across teams.
- Managed GitHub Repository level administration of RBAC, protections and secrets in a HIPAA-compliant space.
- Established reusable CI/CD patterns on GitHub Actions by standardizing usage of shared workflows and actions.
- Developed Ansible roles/playbooks and shell scripting to manage configuration of 2300+ RHEL/SLES systems.
- Managed Helm charts for deployment of 75+ Java Spring Boot workloads to Kubernetes via Harness CD.
- Enabled Terraform adoption on Azure by maintaining and supporting reusable IaC patterns.
- Created internal tooling to automate enablement processes and promote a self-service model for product teams.
- Led planning, coordination, and execution of large-scale CI/CD migration efforts:
 - Migrated 300+ git repositories from BitBucket, GitLab and GitHub Enterprise to GitHub SaaS.
 - Migrated 1200+ CI/CD pipelines from TeamCity to GitHub Actions and Harness CD.
 - Migrated dependency management for 400+ projects from on-prem Artifactory to JFrog SaaS.

Sogeti
